How to Play Sudoku

Fill the 9×9 grid so that every row, every column, and every 3×3 box contains the digits 1 through 9 exactly once. You never need to guess. Each puzzle in this pack has been checked so that it has exactly one solution.

Start with a row, column, or box that already has many clues. Look for a cell that has only one possible digit, or a digit that has only one possible place. Write lightly in pencil.

These puzzles are all Easy. Every empty square can be found with simple scanning. If you get stuck, take a short break and look again, or check the solutions at the back after you have had a fair try.

Print at 100 percent, or Actual size, so the type stays large. Do not choose Fit to page.
